6th Annual China PSS[®]E Software Technology Users Group Meeting

Siemens Energy, Inc., Siemens Power Technologies International (Siemens PTI) will hold China's PSS[®]E Software Technology Users Group Meeting (UGM) at Zhejiang University (浙江大学), Hangzhou (杭州), on November 6 (Friday), 2009. This sixth annual UGM held in China will be jointly hosted by Siemens PTI and Zhejiang University.

The newly released PSS[®]E Version 32 will be demonstrated. This will include new features in contingency analysis and substation reliability assessment, and enhanced short circuit functions. Additions to power flow modeling, switches and breakers on one-line diagrams, generic wind models with generator, electrical, and aerodynamic controls, and many additional features will be shown.

We encourage all Chinese PSS[®]E users to participate in this event and to bring your questions, concerns or suggestions to the meeting. Details of the meeting agenda and logistics will be coming soon.
